PROFESSIONAL SUMMARY : AI FULL-STACK DEVELOPER

Full-Stack AI Developer with 4+ years of experience building scalable enterprise web applications using **React.js, Next.js, TypeScript, JavaScript, Node.js, Redux, Toolkit, REST API using Express.js, MongoDB**. Built **Node.js/Express.js** backend services, including REST API development, **LLM integration, LangChain, LangGraph, LangSmith and OpenAI, Google GenAI API integration**, serving AI responses through custom backend endpoints. Skilled in frontend architecture, UI development, state management, performance optimization, backend API development, and Generative AI application development. Delivered high-performance ESG, EHS, and FinTech platforms with focus on scalable architecture, reusable components, backend API design, and **AI-assisted development using Claude, Cursor, Co-pilot, Antigravity etc.**

TECHNICAL SKILLS

Frontend: React.js, Next.js, JavaScript, TypeScript, React Native, HTML5, CSS3, SSR, Responsive Design, REST API Integration

Libraries: Redux Toolkit, Zustand, TanStack Query, Material UI, Chakra UI, Tailwind CSS, Framer Motion, AG Grid, D3.js

Backend: Node.js, Express.js, REST API Development, API Integration, LLM Integration, Microservices.

Database: MongoDB, MongoDB Atlas, MongoDB Compass.

Tools: Git, GitHub, VS Code, Postman, Swagger, Webpack, React Testing (Jest + React Testing Library), Figma.

AI & Developer Tools: OpenAI API, Google GenAI API, LLM Integration, LangChain, LangGraph, LangSmith, RAG, Prompt Engineering, Embeddings & Vector Databases, Tokenization & Usage Tracking, AI Agents, GenAI with Node.js, MCP, Hugging Face.

PROFESSIONAL EXPERIENCE

SPARROW RMS

Software Developer (Aug 2024 – Jul 2026) | Gurugram, India

- **Built a scalable enterprise ESG & EHS platform (React.js, Next.js, TypeScript) from scratch**, enabling seamless onboarding and support for **100+ enterprise clients** and [50,000+] active users and Integrated LLM-powered features into a production React application.
- Optimized AG Grid and D3.js implementations for enterprise dashboards, processing over 50,000 rows and directly addressing three critical causes of application slowdowns.
- Optimized rendering performance using React.memo, lazy loading and code splitting, reducing initial page load time by 40% while improving Lighthouse performance scores from 60 to 90+.
- Resolved 40+ production issues, conducted peer code reviews and enforced clean architecture principles, reducing regression defects by 35% while improving application stability. Leveraged GitHub Copilot and Claude AI to accelerate development and refactoring.
- **Integrated OpenAI /GenAI LLMs** into incident reporting workflows and used GitHub Copilot, Claude AI and AI-assisted development, reducing implementation and refactoring effort by approximately 30% while accelerating sprint delivery.

ALMONDZ

Software Developer (Nov 2023 – Aug 2024) | New Delhi, India

- Delivered Partner Onboarding, E-KYC and Back-office modules using React.js, Redux Toolkit and REST APIs, improving operational efficiency and reducing manual onboarding effort for internal business teams.
- Engineered a mobile-first Progressive Web Application (PWA) with responsive layouts across multiple screen sizes, improving mobile usability, accessibility and Lighthouse performance.

ANTINO

Associate Software Developer (Jan 2023 – Nov 2023) | Gurugram, India

- Developed and deployed scalable FinTech applications using React.js and Next.js, leading to a 15% increase in user transaction completion rates within the first quarter.
- Implemented a highly scalable Redux architecture and a standardized UI component library, cutting codebase redundancy by [25%] and accelerating new feature delivery timelines by [2 weeks] per quarter.
- Successfully delivered Frontend and 20% Backend solutions for four concurrent client projects while consistently meeting deadline.

VEDAXO TECH SOLUTIONS

Full Stack Intern (Feb 2021 – Aug 2021)

EDUCATION

Sharda University — B.Tech & M.Tech (Software Engineering)

CGPA: 8.6.
